ICANN Portfolio Management System

All Programs

The new ICANN Portfolio Management System is to assist ICANN in effectively managing and prioritizing work activities across its global workforce. ICANN is sharing a snapshot of the Portfolio Management System to increase ICANN's transparency and visibility into ICANN's workload and progress, towards our four management plan objectives and sixteen management goals as guided by the ICANN Strategic Plan as developed by the community.

ICANN's work is organized in a hierarchy of Objectives, Goals, Portfolios, Programs and Projects. Here you can see a high-level status of ICANN's work.

Objectives

Objectives are the highest level of the ICANN work plan, and the responsibility of the ICANN President. The status information for each Objective reflects the status of the component programs and projects within that Objective.
